Trusted by teams who care about first impressions

Onboarding delays hurt employee relationships

HR works hard to give people a great start - but scattered documents, unclear ownership, and inconsistent processes undo those efforts.

Autopilot creates a single source of truth so people, tasks, and timelines never fall through the cracks.

Use one connected system for every employee onboarding

From pre-boarding forms to IT setup, HR tasks, compliance checks, and team handovers - keep every step in one connected, traceable flow.

Give new hires a consistent, well-coordinated onboarding experience without delays, confusion, or missing steps.

See How It Works

Key Features That Matter

Guided Journey

Give employees one simple, step-by-step flow to complete pre-boarding forms, upload documents, and prepare for day one - without endless emails.

Automated Data & Document Collection

Capture employee information, contracts, IDs, and policy acknowledgments through one structured process that keeps everything organized.

Multi-Team Checklists

HR, IT, Managers, Facilities - everyone sees their tasks in one shared place so setup, access, and provisioning happen in parallel.

Role-Based Visibility

Each department sees only the onboarding tasks and data relevant to them, with sensitive information protected by permissions.

Built-In Communication

Clarify questions, share updates, and add notes directly inside the onboarding flow, instead of scattering information across threads and inboxes.

Document Generation & Signing

Automatically create employment contracts, policy forms, and compliance documents, then send them for quick, secure e-signature.

Automatic Archiving

All completed employee documents sync into your HRIS, SharePoint, or internal drive - neatly filed, secure, and audit-ready.

AI-Driven Document Validation

Uploaded documents (IDs, certifications, contracts) are checked for completion and accuracy, reducing errors and preventing first-day delays.

Works with the tools your team already uses

Autopilot fits naturally into your existing environment - no need to rebuild processes.

- **Prepare Once:** Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.
- **Collect What's Needed:** External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.
- **Everyone in Sync:** HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.
- **Deliver a Confident Start:** Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

Made for People. Powered by Process.

1 Prepare Once

Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.

2 Collect What's Needed

External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.

3 Everyone in Sync

HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.

4 Deliver a Confident Start

Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

From Paper Delays to Real-Time, Error-Free Onboarding for YMCA

- Gave remote and rural staff mobile-friendly access, reducing onboarding delays caused by limited computer access.
- Centralized documents and activity logs for easy retrieval, removing back-and-forth and missing paperwork during supplier or partner onboarding
- Standardized onboarding steps through rule-driven digital workflows, ensuring consistency and fewer manual errors.

Results that speak for themselves

"Autopilot Onboarding has transformed our internal processes. What used to take days now takes hours. The visibility and control are unmatched."

Jane Doe
Operations Manager, Tech Solutions Inc.

"The ease of setting up workflows and the clarity it provides are game-changers. Our team is more efficient, and we can make quicker, more informed decisions."

John Smith
Product Lead, Innovate Corp.

"Finally, an onboarding solution that truly understands B2B needs. The customizable features and robust reporting have saved us countless hours."

Emily White
Marketing Director, Global Brands Inc.
