Powered by Autopilot

Onboarding shouldn't feel like a scavenger hunt

Autopilot Onboarding connects every department - HR, IT, Finance, Ops, and anyone else - so the people you're onboarding get one clean, guided flow instead of scattered emails and manual checklists.

Trusted by teams who care about first impressions

Onboarding delays hurt people and partnerships

When onboarding lives in inboxes, mistakes follow. People get duplicate requests. Documents go missing. IT setups are delayed. Teams work from different versions of the truth.

The real issue?

Confusion makes your organization feel disorganized - and creates friction at the very moment you're trying to build trust.

Use one connected system for every onboarding

Autopilot links HR, IT, Finance, and your vendors into one shared onboarding flow - no spreadsheets, no chasing, no guesswork.

- Automate data collection and task hand offs
- Give internal teams role-based checklists
- Let external parties upload documents and sign in one guided journey
- Track progress end-to-end with a clear audit trail

Everything moves in sync, every time.

See How It Works

Key Features That Matter

Guided Journey

Give customers, vendors, and new hires one simple, step-by-step flow to provide details and upload documents - no back-and-forth emails.

Automated Data & Document Collection

Capture information, documents, and signatures from anyone through a single, structured process.

Multi-Team Checklists

HR, IT, Finance, Operations - everyone sees their tasks in one shared place, so work happens in parallel, not sequentially.

Role-Based Visibility

Each team member sees only what they need, with sensitive data protected by role permissions.

Built-In Communication

Ask questions and share clarifications directly inside the flow (instead of spawning new email threads).

Document Generation & Signing

Generate standard forms automatically and send them for compliant e-signature with a click.

Automatic Archiving

Completed documents go straight into SharePoint or your CRM - neatly stored and fully traceable.

AI-Driven Document Validation

Uploaded documents are checked and cross-verified against captured form data, reducing errors and preventing onboarding delays.

Works with the tools your team already uses

Autopilot fits naturally into your existing environment - no need to rebuild processes.

- **Prepare Once:** Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.
- **Collect What's Needed:** External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.
- **Everyone in Sync:** HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.
- **Deliver a Confident Start:** Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

Made for People. Powered by Process.

1

Prepare Once

Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.

2

Collect What's Needed

External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.

3

Everyone in Sync

HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.

4

Deliver a Confident Start

Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

From Paper Delays to Real-Time, Error-Free Onboarding for YMCA

- Gave remote and rural staff mobile-friendly access, reducing onboarding delays caused by limited computer access.
- Centralized documents and activity logs for easy retrieval, removing back-and-forth and missing paperwork during supplier or partner onboarding
- Standardized onboarding steps through rule-driven digital workflows, ensuring consistency and fewer manual errors.
