Trusted by teams who care about first impressions

Onboarding delays slow down reseller potential

Reseller onboarding delays cost revenue and stall activation. Manual approvals and dispersed data slow everything down.

Autopilot brings everything into one workflow so partners get approved, trained, and ready to sell faster - without back-and-forth, missing steps, or follow-up emails.

Use one connected system for every reseller onboarding

Manage partner agreements, product training steps, portal access, compliance requirements, pricing approvals, and go-live activation - all in one streamlined place.

Every team sees what they need to do, every requirement is tracked, and every partner gets a consistent, predictable path to becoming sales-ready.

See How It Works

Key Features That Matter

Guided Partner Journey

Give resellers one clear, step-by-step flow to complete requirements, upload documents, and access training - without back-and-forth emails.

Automated Data & Document Collection

Capture partner details, agreements, tax forms, certifications, and product acknowledgments through one structured process.

Multi-Team Checklists

Legal, Finance, and Product teams see their tasks in one shared place, so reviews and approvals happen in parallel.

Role-Based Visibility

Each department sees only the partner information relevant to their review stage, with sensitive data protected by permissions.

Built-In Communication

Ask questions, share updates, and resolve clarifications directly inside the partner workflow - keeping everyone aligned.

Document Generation & Signing

Automatically create reseller agreements, onboarding packs, or compliance documents and send them for secure e-signature.

Automatic Archiving

Completed partner agreements and documents sync directly to SharePoint, your CRM, or your partner portal - neatly stored and audit-ready.

AI-Driven Document Validation

Uploaded partner documents are checked and cross-verified for accuracy, reducing errors and preventing activation delays.

Works with the tools your team already uses

Autopilot fits naturally into your existing environment - no need to rebuild processes.

- **Prepare Once:** Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.
- **Collect What's Needed:** External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.
- **Everyone in Sync:** HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.
- **Deliver a Confident Start:** Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

Made for People. Powered by Process.

1

Prepare Once

Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.

2

Collect What's Needed

External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.

3

Everyone in Sync

HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.

4

Deliver a Confident Start

Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

From Paper Delays to Real-Time, Error-Free Onboarding for YMCA

- Gave remote and rural staff mobile-friendly access, reducing onboarding delays caused by limited computer access.
- Centralized documents and activity logs for easy retrieval, removing back-and-forth and missing paperwork during supplier or partner onboarding
- Standardized onboarding steps through rule-driven digital workflows, ensuring consistency and fewer manual errors.
