Powered by Autopilot

Vendor onboarding shouldn't slow down your operations

Standardize how you onboard vendors - from documents to approvals - and keep procurement, finance, and compliance perfectly aligned.

Trusted by teams who care about first impressions

Onboarding delays hurt vendor partnerships

Procurement, legal, compliance, and finance all need different information - and they rarely collect it in the same way.

Autopilot eliminates duplicated work and creates a unified vendor onboarding workflow everyone can trust.

Use one connected system for every vendor onboarding

Centralize vendor capture, documentation, compliance reviews, contract uploads, and multi-team approvals - without email chains.

Procurement, Finance, Legal, and Operations stay aligned without email chains or duplicated work, so vendors get approved faster and more consistently.

See How It Works

Key Features That Matter

Guided Vendor Journey
Give vendors one clear, step-by-step process to submit details, upload compliance documents, and complete requirements - without back-and-forth emails.

Automated Data & Document Collection
Capture vendor information, certifications, tax forms, banking details, and contracts through one structured workflow that keeps everything organized.

Multi-Team Checklists
Procurement, Legal, Finance, and Operations see their tasks in one shared place, so reviews, risk checks, and approvals happen in parallel.

Role-Based Visibility
Each team only sees the vendor data and documents relevant to their review stage, with sensitive information protected by permissions.

Built-In Communication
Ask questions, request clarification, or share notes directly inside the vendor workflow - no scattered email threads or lost context.

Document Generation & Signing
Automatically generate standard vendor agreements, compliance forms, or onboarding packs, and send them for fast, secure e-signature.

Automatic Archiving
Completed contracts, compliance docs, and vendor files sync directly to SharePoint, your ERP, or your CRM - neatly stored and audit-ready.

AI-Driven Document Validation
Uploaded vendor documents are checked and cross-verified against captured data, reducing errors and preventing approval delays.

Works with the tools your team already uses

Autopilot fits naturally into your existing environment - no need to rebuild processes.

- **Prepare Once:** Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.
- **Collect What's Needed:** External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.
- **Everyone in Sync:** HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.
- **Deliver a Confident Start:** Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

Made for People. Powered by Process.

1 **Prepare Once**
Set up your onboarding checklist, data fields, documents, and automations - one setup for all future workflows.

2 **Collect What's Needed**
External parties complete a clean, guided journey to submit details, upload documents, and sign agreements.

3 **Everyone in Sync**
HR, IT, Finance, Payroll, and vendors receive structured tasks with full visibility of what's done and what's pending.

4 **Deliver a Confident Start**
Every onboarding ends with validated data, completed documents, and a complete audit trail - without anyone needing to chase.

From Paper Delays to Real-Time, Error-Free Onboarding for YMCA

- Gave remote and rural staff mobile-friendly access, reducing onboarding delays caused by limited computer access.
- Centralized documents and activity logs for easy retrieval, removing back-and-forth and missing paperwork during supplier or partner onboarding
- Standardized onboarding steps through rule-driven digital workflows, ensuring consistency and fewer manual errors.
